Need a custom-built solution?

The AutonoWeld M3 is not off the shelf. You've got options.

AutonoWeld M3: Built for your Needs.

Every shop is different. That's why the M3 isn't a one-size-fits-all machine.

From torch configuration to power supply, we'll work with you to tailor the M3 to your materials, weld specs, and production goals.

You get exactly what you need to weld smarter, faster, and with confidence.

Options			
Heavy-duty 6,000 lb. positioner upgrade (2-36" diameters)	Custom pipe roller stands for various applications	Extended weld cell lengths (25', 45', and 65' options available)	Interchangeable MIG/TIG process configuration using ArcToggle™ technology
Custom integration and fixturing solutions, including cobot compatibility	Dual machine torch configuration for increased productivity (RapidStrike™)	Mechanized Travel Cart	Articulating Arm with vision "buddy" monitors
